CERTIFICATE

This is to certify that the dissert atone titled **“ECOMMERCE – SHOESTORE(Shoe Wonder)”** that is being submitted by ADABALA LEKHYA SAI VENI(20AP1A0501), in partial fulfillment for the award of **Bachelor of Technology in Computer Science and Technology to the Bhimavaram Institute of Engineering and Technology, Jawaharlal Nehru Technological University Kakinada** is a record of bonafide work carried out by them under my guidance and supervision.

The results embedded in this dissertation have not been submitted to any other university/ institute for the award of any degree.

PROJECT SUPERVISOR

Mr P.T.CHIRANJEEVI

Assistant Professor

Department of CSE

HEAD OF DEPARTMENT

Mr U.V.S.V.VINOD

Professor & HOD

Department of CSE

Acknowledgement

I would like to deliver my special gratitude to my class teacher and our project Co-coordinator Mr. **P.T.CHIRANJEEVI sir** Assistant Professor of CSE Department for their valuable suggestions and constant motivation that greatly helped us in successful completion of the project and our principal **Dr. K.SURESH sir** Principal, Bhimavaram Institute of Engineering & Technology - Pennada for his support and constant motivation in successful completion of the project and our HOD **sir U.V.S.VINOD**, Assistant Professor & HOD, Department of CSE for showing their interest in my topic of research and granting me an incredible chance to do this project on the topic of ECOMMERCE - SHOEMART .

Last but not least I would thank my classmates who have helped me a lot.

7	CONCLUSION

INTRODUCTION

The "Online Shoes Store" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and in some cases reduce the hardships faced by this existing system. Moreover this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

The application is reduced as much as possible to avoid errors while entering the data. It also provides error message while entering invalid data. No formal knowledge is needed for the user to use this system. Thus by this all it proves it is user-friendly. Online Shoes Store, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources.

Every organization, whether big or small, has challenges to overcome and managing the information of Order, Customer, Payment, Shopping Cart, Payment. Every Online Shoes Store has different Customer needs, therefore we design exclusive employee management systems that are adapted to your managerial requirements. This is designed to assist in strategic planning, and will help you ensure that your organization is equipped with the right level of information and details for your future goals. Also, for those busy executive who are always on the go, our systems come with remote access features, which will allow you to manage your workforce anytime, at all times. These systems will ultimately allow you to better manage resources.

ABSTRACT :

The purpose of Online Shoes Store is to automate the existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. The required software and hardware are easily available and easy to work with.

Online Shoes Store, as described above, can lead to error free, secure, reliable and fast management system. It can assist the user to concentrate on their other activities rather to concentrate on the record keeping. Thus it will help organization in better utilization of resources. The organization can maintain computerized records without redundant entries. That means that one need not be distracted by information that is not relevant, while being able to reach the information.

The aim is to automate its existing manual system by the help of computerized equipments and full-fledged computer software, fulfilling their requirements, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same.

Software and Hardware requirements :

- **Software requirements :**

- | | |
|------------------------|---------------------------|
| 1. System | - Windows10 |
| 2. Languages | - HTML , Javascript , CSS |
| 3. Browser | - Microsoft Edge , Chrome |
| 4. Scripting Languages | - Javascript |
| 5. Platform | - VisualStudio code |

- **Hardware requirements :**

- | | |
|--------------|----------------------|
| 1. Processor | - Pentium III 630MHz |
| 2. Ram | - 8GB |
| 3. SS | - 512GB |
| 4. Monitor | - 35.6cm/14 inch FHD |
| 5. Keyboard | - 122 keys |

Advantages and Disadvantages :

Advantages of Online Shopping

The internet has revolutionized the way we shop. Because of the numerous advantages and benefits, more and more people these days prefer buying things online over the conventional method of going into stores.

What are some reasons many people love online shopping, and why is it so popular? Below are my top ten reasons for shopping online.

Shopping Online

Advantages of Shopping Online	Disadvantages of Shopping Online
Convenience	Negative environmental impact of packaging and gas
Better prices	Shipping problems and delays
More variety	Risk of fraud
Easy to send gifts	Less contact with your community
More control	Spending too much time online
Easy price comparisons	Returns can be complicated
No crowds	You don't know exactly what you're getting

Advantages of Shopping Online	Disadvantages of Shopping Online
No sales pressure	Unfriendly, scammy, or complicated websites
Access to used or damaged inventory	No sales assistance
Privacy for discreet purchases	No support for local retailers

Benefits of Shopping Online

Shopping online has many benefits. Here are ten of the most important advantages.

1. Convenience

Convenience is the biggest perk. Where else can you comfortably shop at midnight while in your pajamas? There are no lines to wait in or cashiers to track down to help you with your purchases, and you can do your shopping in minutes.

Online shops give us the opportunity to shop 24/7 and also reward us with a 'no pollution' shopping experience. There is no better place to buy informational products like e-books, which are available to you instantly as soon as the payment goes through. Downloadable items purchased online eliminate the need for any kind of physical material at all, as well, which helps the environment!

2. Better Prices

Cheap deals and better prices are available online because products come to you directly from the manufacturer or seller without involving middlemen. Plus, it's easier to compare prices and find a better deal. Many online sites offer discount coupons and rebates, as well.

Not only are prices better, but you can also save on tax since online shops are only required to collect a sales tax if they have a physical location in your state.

Factor in the saved expense of gas and parking, and you have saved yourself a lot of money!

3. More Variety

The choices online are amazing. You can find almost any brand or item you're looking for. You can get in on the latest international trends without spending money on airfare. You can shop from retailers in other parts of the state, country, or even the world instead of being limited to your own geography. A far greater selection of colors and sizes than you will find locally are at your disposal.

Plus, the stock is much more plentiful, so you'll always be able to find your size and color. Some online shops even accept orders for out-of-stock items and ship them when they come in.

4. You Can Send Gifts More Easily

Sending gifts to relatives and friends is easy, no matter where they are. All the packaging and shipping are done for you. Oftentimes, they'll even gift wrap it for you! Now, there is no need to make distance an excuse for not sending a gift on occasions like birthdays, weddings, anniversaries, Valentine's Day, Mother's Day, Father's Day, and so forth.

5. More Control

Many times, when we opt for conventional shopping, we tend to spend a lot more than planned and end up buying items that aren't exactly what we wanted (but we can't find anything better in the store). Online, you don't have to let the store's inventory dictate what you buy, and you can get exactly what you want and need.

6. Easy Price Comparisons

Comparing and researching products and their prices is so much easier online. If you're shopping for appliances, for example, you can find consumer reviews and product comparisons for all the options on the market, with links to the best prices. We can research firsthand experiences, ratings, and reviews for most products and retailers.

7. No Crowds

If you are like me, you hate crowds when you're shopping. Especially during holidays, festivals, or on weekends, they can be such a huge headache. Also, being crushed in the crowds of shoppers sometimes makes us feel rushed or hurried. You don't have to battle for a parking place. All of these problems can be avoided when you shop online.

8. No Pressure

Oftentimes when we're out shopping, we end up buying things that we don't really need, all because shopkeepers pressure us or use their selling skills to compel us to make these purchases.

9. You Can Buy Used or Damaged Items at Lower Prices

The marketplace on the internet gives us access to listings of old or damaged items at rock-bottom prices. Also, if we want to buy antiques, there's no better place to find great ones.

10. Discreet Purchases Are Easier

Some things are better done in the privacy of your home. Online shops are best for discreet purchases of things like adult toys, sexy lingerie, and so on. This enables me to purchase undergarments and lingerie without embarrassment or any paranoia that there are people watching or judging me.

Additional Benefits of Shopping Online

- You get an electronic record of your purchase receipt, which makes record-keeping much easier.
- You get to try things on in the comfort of your own home.
- Sometimes, returns are easy.
- It saves time!

Disadvantages of Online Shopping

Online shopping comes with disadvantages; here are ten of the most problematic elements of shopping on the internet.

1. Negative Environmental Impact of Packaging and Gas

Having your purchase packed in several layers of plastic and cardboard packaging and delivered right to your front door is good for you but not so great for the environment. Even if you try to recycle the cardboard, you're creating unnecessary waste by shopping online.

2. Shipping Problems and Delays

Even the biggest and best shipping companies and online retailers have their bad days, so there's no way to ensure that you'll get your hands on your purchase in time unless you pick it up from a store. Items get lost, detoured, damaged, or delivered to the wrong address more often than you can imagine.

3. Risk of Fraud

If you're shopping online, there's a larger risk of fraud: credit card scams, phishing, hacking, identity theft, counterfeit products, bogus websites, and other scams are common.

4. Spending Too Much Time Online

Especially if your job requires that you look at a computer all day, you might get burnt out on all that screen time. Shopping online can turn into a marathon of scrolling and clicking down rabbit holes, and before you know it, you've been online for most of the day. The internet is a nice place to visit, but you probably don't want to live there.

5. Less Contact With the Community

If you do all your business online, you'll never have to leave your home. This might be great for a while, but sometimes, you might want to go outside, breathe some fresh air, get a change of scenery, talk to real people, participate in your community, and just be a part of the crowd. Sometimes, a computer monitor can't compete with a real human connection.

Plus, shopping at small local businesses can help support your community and help your area thrive.

6. You Don't Know Exactly What You're Getting

Unless you are intimately familiar with a brand or product, buying online requires a leap of faith . . . one that doesn't always end in your favor. Sizes are often

imprecise. You can't determine texture, fabric, fit, cut, quality, heft, or durability just by looking at a photo. Products that looked great might feel chintzy, awkward, or cheap when you hold them in your hands.

This is true of [online shopping](#) as well—if you're particular about things like produce, you may want to get those yourself and use Instacart for brand-name products that don't need to be assessed before purchase.

7. Returns Can Be Complicated

Some sellers make the process breezy, but many make it extra hard for you to return their merchandise or get a refund. Many times, you can't get reimbursed for any shipping costs.

Labeling, packaging, shipping, tracking, and filling out all the proper forms are a hassle you can avoid if you buy in person (and if you hand-select your merchandise, you won't need to return things so often).

8. Unfriendly, Scammy, or Complicated Websites

Some sites require that you join their mailing list and make it impossible to unsubscribe. Some sell your email address to others, so your email is full of ads. Sometimes, sites don't offer good or accurate descriptions of the goods, or you just can't figure out how to purchase or return an item or speak to customer service.

9. No Sales Assistance

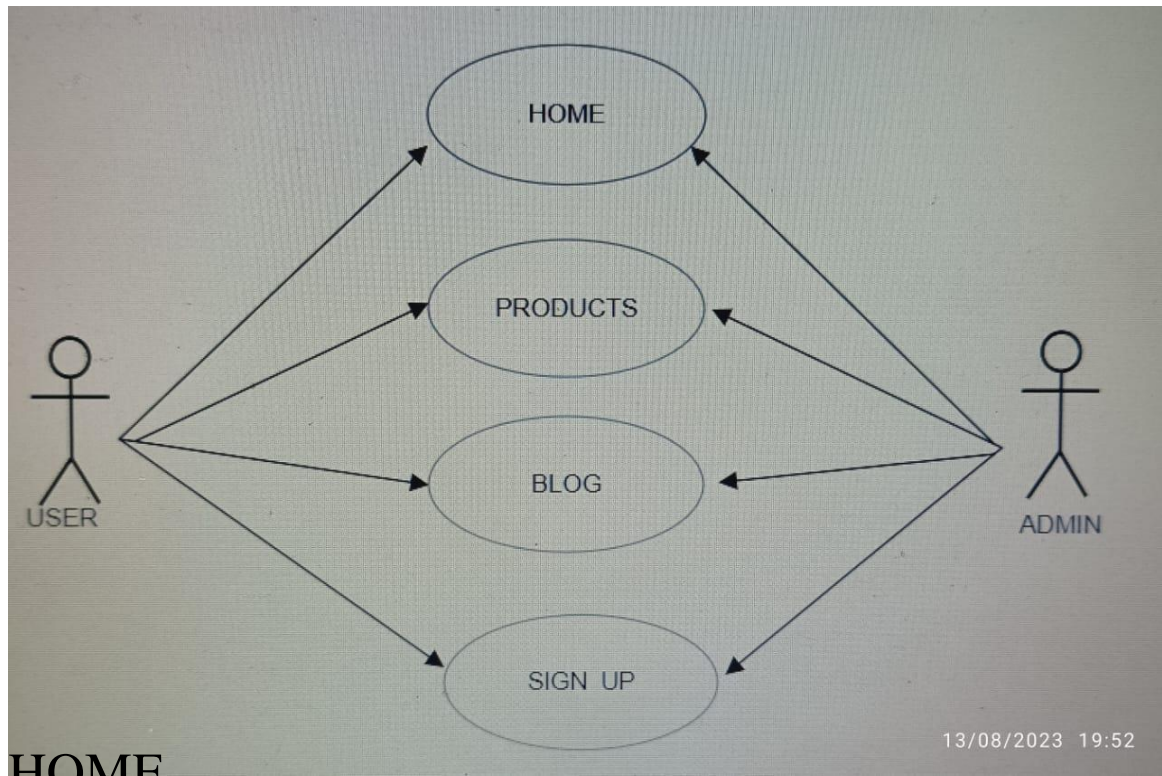

In a store, there's usually someone to help you, but online, you're on your own. If you're confused or have questions, it's just too bad for you. You might have to make blind purchases and mistakes you'll regret later because there was no one to talk to.

10. No Support for Local Retailers

If everyone started doing all their shopping online, all the local stores would go out of business. When all the stores in town are gone, we'll have to drive further and further away to shop at a real store.

Many people and places have already experienced the negative and sometimes devastating impacts of e-commerce, which take away jobs and devastate local economies.

CONCLUSION

Conclusion of the Project Online Shoes Store:

Our project is only a humble venture to satisfy the needs to manage their project work. Several user friendly coding have also adopted. This package shall prove to be a powerful package in satisfying all the requirements of the school. The objective of software planning is to provide a frame work that enables the manger to make reasonable estimates made within a limited time frame at the beginning ofthe software project and should be updated regularly as the project progresses.

At the end it is concluded that we have made efforton following points...

A description of the background and context of theproject and its relation to work already done in thearea.

Made statement of the aims and objectives of theproject. The description of Purpose, Scope, and applicability.

We define the problem on which we are working inthe project.

We describe the requirement Specifications of thesystem and the actions that can be done on these things.

We understand the problem domain and produce amodel of the system, which describes operations that can be performed on the system.

We included features and operations in detail,including screen layouts . We designed user interface and security issues related to system Finally the system is implemented and testedaccording to test cases.
